KRISH SHIYANI

PYTHON / DJANGO DEVELOPER

OBJECTIVE

To begin my career as a Python/Django backend developer where I can apply my programming skills, learn real-world development practices, and contribute to building scalable web applications.

EXPERIENCE

E-COMMERCE BACKEND API
Personal Backend Development Project

Developed an e-commerce backend system using Django and Django REST Framework with PostgreSQL database. Implemented secure user registration and login using JWT authentication with Simple JWT. Created REST APIs with token-based authorization and CRUD operations. Designed backend following Django MVT architecture and tested APIs using Postman for validation and security.

PORTFOLIO WEBSITE
Self / Personal Project

Developed a personal portfolio website to showcase my projects, skills, and learning journey as a backend-focused developer. The website is designed with a clean and simple structure and provides information about my technical background, projects, and contact details. It serves as a professional online presence for recruiters to review my work and understand my development skills.

ABOUT ME

I am a Python/Django backend developer with a strong interest in building server-side logic and REST APIs. I have hands-on experience with Python, Django, Django REST Framework, and database management using MySQL and SQLite. I enjoy writing clean code, solving backend problems, and learning new technologies to improve my development skills. I am looking for an opportunity to work on real-world projects and grow as a backend developer.
